# Fast EDM, 16-hour battery and superior Nikon optics

**Nikon** The Nikon® DTM/NPL-302 Series total stations from Tripod Data Systems™ (TDS) deliver a versatile, easy-to-use platform to help you get the job done right. Nikon's world-renowned optics give you brighter, clearer images. Fast, accurate Electronic Distance Measurement (EDM) helps you move quickly from point to point. Battery life is the longest in the industry—16 hours—so you can work through even the longest day with no battery changes. The built-in software includes several easy-to-use alpha input modes to help you work more efficiently. And its lightweight, waterproof construction ensures reliable performance in tough field conditions.
## See brighter, sharper, clearer images

You'll see the difference when you look through a Nikon total station. Nikon's legendary optics effectively let in more light. The result is brighter, sharper images, even in the low-visibility conditions typical in the field. You'll see much more detail and much less distortion, especially over longer distances. Better optics help you aim more precisely, and they're much easier on your eyes—something you'll really appreciate on long workdays.

All Nikon telescopes use a unique linear focusing mechanism that improves focusing at both short and long distances. And the large focusing knob is easy to use even when you're wearing gloves.

## 16-hour battery and rugged construction keep you going in the field

The 302 Series features the industry's longest-lasting battery—a BC-65 clip-on that gives you up to 16 hours of continuous distance/angle measurement; with one measurement every 30 seconds, battery life extends to 27 hours. That means you can work all day without having to stop and change the battery.

The 302 Series also features rugged, lightweight construction for reliable performance in the field—just 11.5 to 12.1 lbs with battery, depending on model. And all 302 Series total stations come with an IPX6 waterproof rating. That means the total station can withstand a powerful jet of water with no harmful effects. You can count on your total station to work just as hard as you do.
